

SMILE PREVIEW

On September 30, 2015 we held our first **Smile Preview Event** at the office. Patients had the chance to experience PreNew-PreView, a new technology that allows you to see what you would look like with veneers in your own mouth before you even start!

Jason J. Kim, Master Ceramist and founder of PreNew PreView, collaborated with Dr. Forlano to test drive ten new smiles. Our models had the opportunity to show off their new look among family and friends at our reception.

The results were remarkable!

Many patients who often refrained from smiling, smiled proudly for the first time in years! PreNew PreView is a noninvasive first hand look at the potential of what your smile could look like before beginning treatment.

Thanks to Adele & Salon Due Mila

Adele Santoro, proprietor of Salon Due Mila in Merrick, NY, graciously offered her services to brighten the day of Pattey & Eddie, husband & wife. Pattey learned about the Smile PreNew PreView Event and expressed an interest in being a model for the day. With the help of Adele and her assistant Josie Soto, we were able to do a complete makeover....hair, makeup and a Smile Preview! Thank you Adele, and everyone at the salon!!

Eddie

Collaboration with a Professional

Until now there was no way of seeing what your teeth would look like with veneers. This prevented many people who wanted veneers to go forward with the treatment. PreNew PreView is a very simple technique created by Jason J. Kim that offers a noninvasive, first hand look at the potential of what your smile could look like before beginning treatment.

Jason J. Kim is a Certified Dental Technician and is the Founder and President of Jason J. Kim Dental Aesthetics. He also operates the Oral Design Center in NYC. He lectures nationally and internationally, and has written numerous articles and co-authored books on esthetic restorations and team communication. He is a member of the International Oral Design Foundation, Dental Laboratory Association of New York and the American Society for Dental Aesthetics. He is also Clinical Assistant Professor at New York University College of Dentistry. I am truly honored to collaborate with such a true professional. Please **visit www.jjkda.com** to see what goes into creating a natural porcelain veneer.

What They Said...

"I was very happy with the results. It is great to be able to see what my smile would look like if I got veneers. One of my biggest fears is not liking the final results and not being able to go back. With this preview it was an opportunity to see the possible outcome without the worry."

"My teeth have improved in appearance. I am eager to look into the veneers to make more improvements."

"Thank you Dr. Forlano for your professional and companionate care you have provided to me over the years."

"Love the results!!!"

"I never expected my smile to change so dramatically. I always thought my smile was perfect until I saw them after the PreNew PreView procedure."

"Besides the beautiful smile through hard work Dr. Forlano has provided, each and every employee has been helpful, courteous, and kind. My life has been forever changed for the better and I owe it to each and every person here."

"Extremely impressed by the work Dr. Forlano and his staff have provided me. Thank you so much!!!"
